

TDH200 Mag Holder

The TDH200 door holder is composed of a door mounted catch plate and a floor- or wall-mounted electromagnet.

The EM Series magnets offer superior reliability with built-in protection and low residual magnetism so they release easily even in applications meeting ADA requirements with minimal spring force door closers. Brackets are not required for recessed, flush, or surface mounting. The surface mounting box has three conduit-ready entries. The catch plate on the door features two pivot points and two-way adjustability to further ensure perfect alignment. Optional extension rods are available to accommodate greater distances between the door and wall.

Operating Grip Mechanisms and Trim

- U.L. and C.U.L. listed.
- M.E.A. (New York City), Factory Mutual, and California State Fire Marshall (CSFM) approved.
- Dual voltage (24/120V) capability reduces stocking requirements.
- Low current draw allows savings on power supplies and backup batteries.
- Optional extension rods fit on standard door catch plate to accommodate deeper door to wall conditions.
- Low residual magnetism allows easy release of door.
- All electrical values +10% to -15%.
- Can be manually pulled from hold open position.
- Silent operation.
- Holding force 35 lb nominal.
- Chrome – 626 (Satin).
