To whom it may concern,

I have DSI 600 Elevator Smoke Curtains installed in one of my high-rise buildings here in downtown LA but in the future, I would like to install them in others. Unlike other elevator smoke curtains we have used in the past, the DSI 600 curtains all come down at the same time in a controlled rate of decent and require a no effort to reset. The DSI 600 system works every time.

The thing that surprised me most is that they are so concealing and you would never know they were there. This is important to landlords and architects looking to use a system that works yet blend in with the surroundings.

The Door Systems staff does a great job and are very attentive. I would recommend Door Systems and the DSI 600 Elevator smoke Containment Systems to any landlord or operations manager in need of a smoke and fire containment system.

Sincerely,

Philip Hernandez, Operations Manager at The Swig Company
